Product Information

How long do they last?

Our kits & cards all have a 12 month shelf life.

My customer doesn't have a microwave, can they still bake the cake?

Our patented pop-up baking case is oven safe, so the short answer is *Yes!* Although the recipe is designed with microwave baking in mind so typically when our cakes are baked in the oven or air fryer they do not rise quite as well as when baked following our directions in the microwave.

What ingredients are used to make your product?

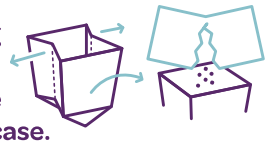

Our products are proudly made in a **PEANUT FREE FACILITY.** We strive to provide our customers with the best ingredients possible, sourced within North America. Please see the back of your item for specific ingredient information.

What is the difference between the card and the kit?

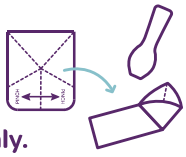

Each card comes with everything they need to bake a delicious cake, packed inside of a traditional birthday / celebratory card. Each card comes with a matching envelope, that does fit through the mail slot for easy shipping. Our Celebration Cake Kits are everything needed to bake a delicious cake inside a kit perfect for gifting, party favors, stocking stuffers and more!

How to Make Your Cake

1. Pop open baking case and empty contents of cake mix into baking case.

2. Fold water measure, fill measure with water and deposit water into baking case 4 times. Mix thoroughly.

3. Bake in microwave on high for 60 seconds.

4. Allow to fully cool. Tear open frosting pouch, apply frosting and spread evenly.

5. Decorate with sprinkles, candle and cake topper.

6. Enjoy and share.
