

# MICE

## A MET SCHOOL INTERNSHIP INITIATIVE

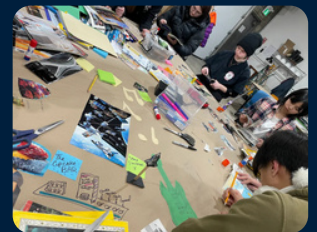

**The Met Innovation Centre for Entrepreneurship (MICE)** Program offers students a hands-on internship experience focused on creativity, problem-solving, and real-world business skills. Through project-based learning, students collaborate with mentors, entrepreneurs, and community partners to explore innovation, design thinking, and entrepreneurship. Participants gain practical experience in areas such as idea development, marketing, pitching, and project management, while building confidence and professional skills. The MICE Program encourages students to **take initiative, think critically, and learn by doing**, preparing them for future studies, careers, and entrepreneurial opportunities in a rapidly changing world.

### MICE LITE (GRADE 9)

**MICE Lite** is an introductory program designed for Grade 9 learners to explore creativity, innovation, and entrepreneurship. Students are introduced to design thinking, teamwork, and problem-solving through hands-on activities that build confidence, curiosity, and foundational skills for future learning in the MICE program.

- *Entrepreneurship*
- *Small Business*
- *Design Thinking*
- *Project Design and Development*
- *Real-World Opportunities*
- *Participants in Grades 9 - 12*

### DISCOVERING ENTREPRENEURSHIP

**Stephen Sim** is the MICE mentor, guiding students through entrepreneurship, innovation, and real-world problem solving, drawing on industry experience to inspire creativity, confidence, and purposeful learning in youth education programs.

**Semester Long Internship Experience**
